

## DMP Mission - Whole community resilience through deep social capital . . . Collaborations, connections and coordination create *Social Capital*

We facilitate first handshakes.

We are doctors, nurses, builders, construction workers, businessmen, emergency managers, paramedics, attorneys, commissioners, councilmen, retired Military, firefighters, cyber and software engineers, PIOs, college students who live and work here in the community... citizen-volunteers all.

We concentrate on building TRUST, local recognition and branding through supporting and participating in local, state and federal level exercises and training as well as planning/advisory groups and committees ... By sitting or “playing” side-by-side with responders in multiple lanes and layers, we identify and enhance community capability and help clarify incorrect assumptions ... who can do what.

We find synergy and traction between various lanes ... LE, Fire, EMS, schools, hospitals/clinics, churches, Emergency Management, Poison Control, volunteer groups, the Military, public health, private business ... all bring something ... what’s missing is mutual understanding of capability, expectations and subsequent operational coordination.

### **We are a community-based “AED”:**

**A** - **Assist and Augment** ... by strengthening local immediate response capability and force multiplying

**E** - **Educate** - Stop the Bleed / BDLs / Incident Command / Active Shooter

**D** - **Design and Develop** collaborative training and exercises to improve coordination

DMP brings a homegrown/organic vested interest, asset leadership and resource management - *Logistics Wins Wars*

Social capital mining, innovation, development and promotion

**WE LISTEN / WE LEARN / WE HELP / WE LEAD, IF NECESSARY**

Even Batman had Robin
